***Allowable Subject Matter***

1. Claims 1-33 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 recites a plurality of container assemblies comprised of a first and second assembly wherein each of the container assemblies have an inner container nested within an outer container and each assembly also having outer containers with substantially identical outer dimensions. In addition, the inner container of the first assembly is configured to define a first volume for the first assembly that is greater than a second volume defined by the inner container of the second assembly. Claim 15 recites that the first and second volumes are defined by a difference in wall thickness but have substantially identical headspaces. Claim 19 recites that the first and second volumes are defined by a difference in the distance that a closure extends into each volume. Claims 24 and 26 recite methods of using the assemblies or containers.

The Examiner considers Gautsch to be the closest prior art. Gautsch teaches a plurality of container assemblies wherein each of the container assemblies have an inner container nested within an outer container, but does not teach or suggest that the internal volume of the inner container of one assembly may be different from that of a second assembly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1797

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
